

Windows 7™ is here. Need help Packing?

Application Packaging Service

GreenStartConsulting.com

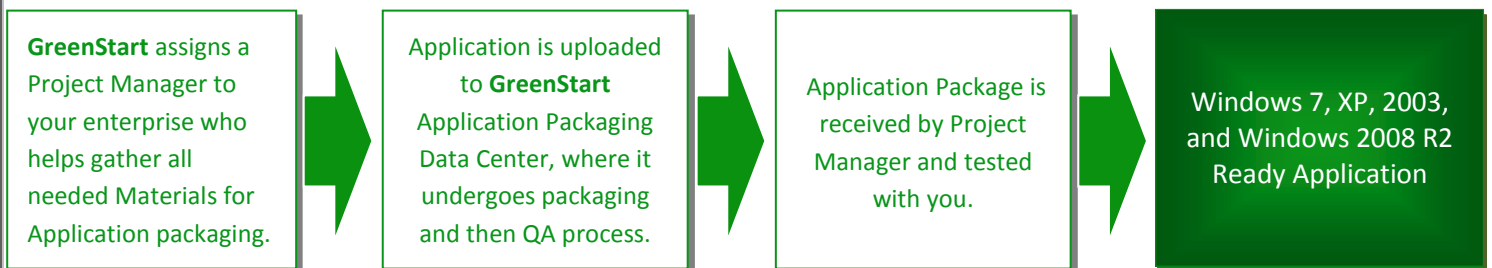

GreenStart™ is here to help ease your Re-Packaging Process, to or from any operating system, by offering a Professional Application Packaging Service.

The GreenStart "Application Packaging Service," was created to package your most critical enterprise applications. Our process involves minimal touch time with client infrastructure to ensure the fastest turnaround. Meaning less time fixing applications, and more time using them.

Migrations do not happen overnight

GreenStart™ works to ensure your company migration has as little End User Interruption as possible. We know productivity is directly tied to the tools your employees use. A Seamless Transition is keystone in our strategy.

How it Works:

Application Packaging Service Key Benefits:

- **Save Time**
- **Save Money**
- The APF model provides reliable SLAs, predictable costs, high-quality, and well-tested applications.
- The process knowledge, technical expertise, and custom toolsets ensure applications are Migration ready.
- End-users experience a rich application experience.
- No Need for extra infrastructure or personnel to package during migration swell.
- End Users can move to any platform, and experience identical application behavior.
- IT Departments can centrally deploy applications on any platform desired.
